

EXECUTIVE DECISION DOCUMENT

Executive Decision Report

GLOBAL E-COMMERCE BUSINESS INTELLIGENCE & STRATEGIC RECOMMENDATIONS

Validated baseline: \$484.56K sales · \$158.87K profit · 32.79% margin · 2,000 orders

PREPARED BY: [YOUR NAME] · BUSINESS INTELLIGENCE CAPSTONE · SEPTEMBER 13, 2026

EXECUTIVE SUMMARY

Profitable growth is the decision, not sales growth alone

VALIDATED BASELINE

\$484.56K sales • \$158.87K profit

32.79% margin across 2,000 orders and 1,534 customers; \$242.28 average order value.

GROWTH POOLS

Consumer and three regions lead

Consumer is approximately \$256.29K; Europe, North America, and Asia Pacific are the strongest regional pools.

MANAGEMENT FOCUS

Protect the core; expand profitably

Repair Office Supplies economics, scale Technology with guardrails, and focus customer and regional growth where demand is already strongest.

REVENUE ENGINE

Furniture anchors the portfolio

Approximately \$256.27K, more than half of sales; Technology follows at approximately \$139.52K.

WATCHOUT

Office Supplies trails on margin

Approximately 17.1% margin; discounting shows an observed correlation with profit of about -0.14, not causation.

Management needs a clearer link from transaction data to action

How can the business improve revenue growth, profitability, customer performance, and resource allocation?

Turn evidence into three decisions with explicit owners, guardrails, and measures of value.

Objectives: validate KPI baselines; identify revenue drivers and margin gaps; assess category, segment, and regional opportunities; test risks without overstating causality; define three actions and a measurable implementation path.

Audience: C-suite executives, business managers, and a mentor evaluating a BI capstone.

DECISION CHAIN · DATA → ANALYSIS → INSIGHTS → DECISIONS → BUSINESS IMPACT

Data	Analysis	Insights	Decisions	Impact
Transactions and measures	Drivers, gaps, and risks	What the pattern means	Where management acts	Business value tracked

A compact analytical workflow converts 2,000 orders into a management view

01

Raw data

Order IDs, dates, customer, segment, country, region, product, quantity, pricing, discount, sales, shipping, profit, payment.

02

Clean & validate

Standardize fields, validate records, reconcile totals, and create usable time dimensions.

03

Calculate KPIs

Set baselines, then analyze revenue, profit, customers, regions, trends, discounts, and shipping.

04

Translate to action

Convert evidence into recommendations, scenario assumptions, owners, and measures.

Data note: The uploaded CSV is unavailable in this session. Figures shown are validated against the current deck; monthly trends and quantity sold require CSV validation before external circulation.

The business is profitable overall, with a clear portfolio opportunity

CSV validation required

Do not publish a quantity total until global_ecommerce_sales.csv is reconciled to the 2,000-order baseline.

EXECUTIVE READ

Profitability is real, but uneven

The next decision is portfolio quality: protect scale, repair weak-margin economics, and fund growth selectively.

Implication: headline profitability should not obscure category-level economics; management should allocate attention where the margin gap is largest.

REVENUE DRIVERS

Furniture is the revenue anchor; Consumer and three regions widen the growth map

Sales by category · USD, approximate values from the validated deck baseline.

GROWTH MAP

Scale existing demand before chasing unproven markets.

Segments: Consumer \$256.29K · Corporate \$146.05K · Home Office \$82.22K.

Regions: Europe \$137.01K · North America \$133.88K · Asia Pacific \$121.71K.

Office Supplies is the clearest margin repair opportunity

Category	Sales	Profit	Margin
Furniture	\$256.27K	\$81.17K	31.7%
Technology	\$139.52K	\$48.27K	34.6%
Clothing & Accessories	\$69.38K	\$26.11K	37.6%
Office Supplies	\$19.39K	\$3.32K	17.1%

HIGH REVENUE / HIGH PROFIT

Furniture

Availability and margin discipline.

HIGH MARGIN

Clothing & Accessories

Protect profitable demand.

OPTIMIZATION AREA

Office Supplies

Review pricing, discounts, sourcing, and shipping.

FINDING

Office Supplies under-converts sales to profit.

Impact: a 17.1% margin limits reinvestment. Implication: repair pricing, discount, sourcing, and shipping economics.

RECOMMENDATION 01

Run a 30-day margin diagnostic, then pilot guardrails.

Use category/order-level contribution, not correlation alone, to floors and shipping thresholds.

Consumer customers and three regions form the strongest growth pools

SEGMENT ECONOMICS

RECOMMENDATION 02 · TECHNOLOGY

Scale profitable demand with guardrails.

Expand tested Technology offers while protecting the approximately 34.6% margin and monitoring availability.

REGIONAL SALES

RECOMMENDATION 03 · CUSTOMER / REGIONAL

Retain Consumer customers and concentrate growth.

Prioritize Europe, North America, and Asia Pacific for retention, cross-sell, and inventory allocation.

Use disciplined tests to fund the three recommendations

OBSERVED RISK

-0.14

Discount-profit correlation

Correlation, not causation. Use controlled tests and contribution analysis before changing policy.

Scenario	Projected benefit	Investment	ROI	Assumption
Office Supplies repair	\$12K estimated annualized profit lift	\$4K	200%	Diagnostic + guardrails improve contribution; validate with pilot.
Technology growth	\$24K projected annualized profit lift	\$10K	140%	Targeted demand expands while margin stays near 34.6%.
Customer / regional growth	\$18K projected annualized profit lift	\$8K	125%	Retention and cross-sell focus on leading segments/regions.

Transparent formula: ROI = (Projected Benefit – Investment) / Investment × 100. All benefits are scenario estimates, not historical results; validate inputs before funding.

Required CSV check: validate monthly sales, profit, quantity sold, and pilot baselines before publishing a forecast or claiming realized ROI.

RISK

Discount leakage

Measure profit response by category and order context.

OPPORTUNITY

Regional growth

Scale proven demand pools with discipline.

RISK

Shipping drag

Test whether delivery economics suppress contribution.

OPPORTUNITY

Margin repair

Prioritize Office Supplies optimization.

Five findings point to a focused operating agenda

1 1. Furniture leads revenue. Business impact: scale and category dependency. Management implication: protect availability and enforce margin discipline.	2 2. Technology combines scale and margin. Business impact: meaningful demand at approximately 34.6% margin. Management implication: make profitable Technology expansion the growth lever.
3 3. Office Supplies under-converts sales to profit. Business impact: \$19.39K sales produces \$3.32K profit at 17.1%. Management implication: repair pricing, discounts, sourcing, and shipping.	4 4. Consumer customers lead economics. Business impact: approximately \$256.29K sales and \$87.30K profit. Management implication: prioritize retention and personalized cross-sell.
5 5. Europe, North America, and Asia Pacific lead regions. Business impact: the strongest regional demand pools. Management implication: guide marketing and inventory allocation from existing strength.	

30 DAYS Diagnose & baseline Validate CSV, define owners, launch Office Supplies margin diagnostic.	60 DAYS Pilot & measure Test discount/shipping guardrails; launch Technology and regional growth pilots.	90 DAYS Scale & govern Review pilot ROI, scale winners, and set monthly executive scorecard.
